Doors	Swing or Bi-parting Doors, at serving height or floor level.
Dimensions	Please refer to your Sanscord Representative for optimum arrangement and dimensional details for your project.

Quiet Operation

- Quality engineering ensures a quiet operation.

Economical

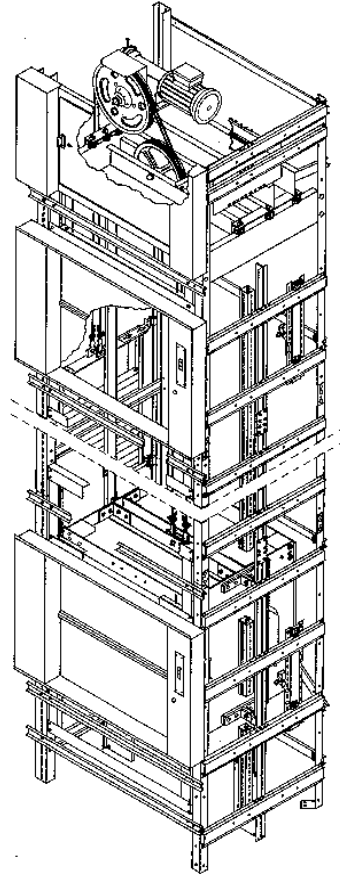

- Efficient drive system to minimise power requirements.

Space Saving Design

We are able to tailor our dumbwaiters specifically to suit your shaft sizes.

Flexible Machinery Location

- A number of optional machine arrangements are available, including the machinery housed within the lift shaft, reducing the space requirement even further.

Self-Supporting Tower

- The durable galvanised steel tower provides the lift shaft with minimal design and structural impact to your building.

Accessibility

- Available with Front, Front/Rear or Front/Side Entrance arrangements.
- Entrances can be located at floor height or at "serving" height (typically 900 mm above floor level).
- Swing open doors and vertical-bi-parting doors are available for each landing.

Finishes

- Practical and hardwearing painted furniture steel or optional finish stainless steel finishes for entrances and car interior.

Warranty & Service

- 12 Months Warranty & Service are included. We can also provide you with on-going regular service visits to maintain your lift.
