Platform Hoists

The Platform Hoist Range

A Platform Hoist can provide you with an innovative and cost effective solution to your vertical transportation needs. Platform hoists can serve a maximum of 2 levels.

Usage	Commercial Use
Design Compliance	AS-1418 Crane Code
Drive & Motor	Hydraulic Drive
Load	From 350 to 2000 kg
Control System	Constant Pressure "Call & Send" operation, microprocessor controls.
No. Of Stops	2 Stops maximum.
Opening Location	Entrances can be located at front, front / rear or front / side.
Structure – By Builder	You would provide a structural well. The well must be smooth and flush internally so as to maintain a 25 mm clearance from the moving platform.
Structure – By Sanscord	As an alternative we can provide a self-supporting enclosure
Power Supply	3 phase power supply required
Machine	At side or rear of shaft to suit your requirements.
Entrances and Doors	A choice of manual or powered doors are available.
Platform Dimensions	The platforms are custom made to suit your individual requirements. Please refer to your Sanscord Representative for optimum arrangement and dimensional details for your project.
Shaft Dimensions	Please refer to your Sanscord Representative for optimum arrangement and dimensional details for your project.

Features and Benefits

Usage

- Platform hoists are custom designed to suit your particular needs.
- Typical applications include the handling of goods between floors.
